# BSR-050

## EASILY INTEGRATES INTO EXISTING INFRASTRUCTURE:

Utilizes existing media vessels and controls

Optimization with minimal CAPEX

Change-outs with conventional cranes and vacuum trucks

---

## ENGINEERED FOR LOW OPEX:

Highest capacity of any dry media solution

Minimal operator monitoring and interaction

Non-bricking formulation simplifies spent media removal

Color change reveals media utilization

---

## ENGINEERED FOR LOW-RISK STRATEGY:

Highly selective chemistry minimizes hazardous waste disposal risk

Operator able to revert to previous media without incurring additional expense

OPEX can be minimized for first trial run

*Guild Associates has BSR-050 available in both 1,000 and 1,500 lb supersacks for direct delivery to your site. Contact us about setting up a pilot or trial load of BSR-050.*
